Glass *is made of glass!*

Why change to unbreakable glassware?

You save money
Unbreakable glass is CHEAPER in the long run

Increased safety
The glasses cannot be used as a weapon

Less wear and tear on furniture
Broken glass will not be trodden into the carpet/floor

Positive mention in local media
YOU are doing something for safety and environment

Reduced weight
Improves your staff's working environment

Less cleaning
Spend more time on your customers
instead of wasting it on sweeping up broken glass

Excellent insulation
Keeps cold drinks colder and hot drinks hotter
Freeze the glasses in 5 min. and serve the drinks ice-cold

Top Quality
Our unbreakable glassware looks
and feels exactly like real glass

About Glass4ever

Glass4ever design, produce and sell unbreakable drinking glassware all over the world.

The products are made of different kinds of specially developed plastic ensuring that the glasses never break; pieces of broken glass are not left lying around and cannot be used as a weapon.

Our products are used wherever focus is on safety, working environment and economy. All our products have been tested by independent laboratories and are of course food approved.

We offer the best quality in the market – our glasses look, weigh and feel exactly like ordinary glasses.

We are a 100% Danish owned company located in Vejle, Denmark.

Logo on glass

Glass4ever produces a wide assortment of 100% unbreakable glassware. We also produce glasses with logo to several large companies. If you need further information about quantities, prices, etc. please feel free to contact us for a quote.

Glass4ever can "tailor-make" all glasses, giving our customers a unique glass and the design needed. There are no limits - any design can be created!

Cleaning of Glass4ever products

The products can be cleaned in exactly the same way as ordinary drinking glasses. They can be hand-washed, washed in an ordinary dishwasher or in an industrial dishwasher.

You can also boil most of the products, as they withstand temperatures of up to 120°C depending on the material. See material sheet to make sure.

Note: Never use abrasives, steel wool, razor blades or other sharp utensils for cleaning. There are no special demands as to the washing-up liquid (but see "best result" below), so just use your normal brand. When hand-washing the products, use a soft sponge, washing-up brush or a microfiber cloth.

To remove soap stains, rinse in clean water and dry remaining drops of water with a damp soft sponge or cloth. Do not use benzine, alcohol, ester or organic solvents for cleaning.

The following may discolour the unbreakable glasses and make them cloudy in the long run:

- Washing at more than 70 degrees for a longer period
- Lack of osmosis system
- Overdose of rinse aid
- Use of soap with metal protection
- Use of incorrect wash tray for glass (do not use the tray for cutlery or plates)
- Milk products / drinks can leave a lime residue if the glass is not washed with hot soapy water shortly after use
- Use of anise-based drinks (such as Pernod, Ricard, Raki or Ouzo)

Best result

If you want the best treatment for your Glass4ever products, we recommend that you use our Proton dishwashing products. Proton specializes in the supply of high technology, cost effective and innovative cleaning and disinfection dishwashing products. *For more information, see our website.*
