

Aeroclean® IC 240

Disinfecting aircraft cleaner

Advantages:

- *without alcohol*
- *Pulls away quickly - without streaks*
- *Especially developed for the aviation industry*
- *Safe for plastic surfaces, aircraft windows, Makrolon, acrylic, Plexiglas, etc.*
- *Removes oily and greasy soiling as well as other environmental pollution*
- *Causes no stress cracking*
- *Acts antistatically on the treated surfaces*
- *pleasant smell*
- *The product fulfills the requirements for biodegradability*

Aeroclean IC240 is used especially in the areas of cabin, galley, cockpit and lavatory. Cleans and disinfects residue-free and streak-free all plastics, Plexiglas, Macrolon and lacquered metal surfaces. Due to the antistatic effect, the product is recommended for screen cleaning on board monitors. Due to the disinfectants contained, the product is effective against bacterial strains, fungi, sporades as they occur in kitchens and toilets. In addition, good efficacy against viruses (especially hepatitis B and HIV) is achieved.

Application in aircraft:

An application concentration of 1:10 is to be selected for transit purification. In the area of night-stop cleaning, a dilution of 1: 5 is recommended to achieve an improved disinfecting effect.

The application solution is sprayed onto the surfaces to be cleaned or applied with a sponge / cloth. After a short exposure time, wipe with a dry or damp cloth.

**Tested by AMS 1550B, Boeing Doc. D6-17487,
Boeing D6-7127, Airbus u. McDonnell Douglas
ASTM F 487, LH-Specification, Desinfectant test**
