

CONSTIX™ Swab, SF-13ESD

Sealed foam swab, small pointed-tip

Description

CONSTIX SF-13ESD static-safe swab consists of a pointed-tip foam head sealed and attached to a conductive polymer handle.

The conductive handle is great for static-sensitive applications. The polyurethane foam head provides good particles entrapment and removal. The absorbent foam enables solvents, such as isopropanol and ethanol, to be readily sorbed for applications involving solvent delivery and removal.

The fine point enables access to very small areas and crevices. The SF-13ESD is also compatible and sorbent with most common solvents. Contains no binders or adhesives. Not recommended for use with ketones, such as acetone or MEK.

Technical Data

Swab head material	100 PPI open-cell polyurethane foam
Swab handle material	Stat-rite ESD, acrylic polymer
Construction	Thermally sealed/attached

Notes:

- 1) Data shown are typical values and should not be used as product specifications.
- 2) Valid product comparisons may only be obtained through side-by-side testing in the same test facility, under similar conditions.
- 3) Current and/or comparison data may be available. Please contact a Contec sales representative for details.
