

Laerdal

helping save lives

The BAG™

Single-patient use BVM resuscitator

The BAG™ is a single-patient use, manual resuscitator made with high-quality materials. It is equipped with a range of features that make it userfriendly, such as an integrated hand strap, excellent recoil and a rotatable bag. It is designed to meet the latest safety and performance requirements.

The BAG is available in 3 sizes - Adult, Pediatric and Newborn.

The BAG offers additional features compared to the previous disposable BVM resuscitator, The BAG II.

The BAG™ Product Features

- ✓ Self-inflating bag is made with materials that are both PVC free and Phthalate free*
- ✓ It is designed to meet the latest safety and performance requirements.
- ✓ It has an integrated hand strap that helps to form a secure grip.
- ✓ Highly visible Pressure Relief Valve for ease of use. Adult and Pediatric versions have a simple and intuitive locking system.
- ✓ Made with high quality materials, it offers excellent recoil for a smooth bagging experience.
- ✓ It comes with Laerdal's well trusted face mask, known for its good seal that reduces chance of mask leakage.
- ✓ The BAG can rotate, allowing for uninterrupted ventilation in case you need to change positions.
- ✓ High-quality large valves enable delivery of oxygen concentration of up to 98%.

Integrated PEEP-port and Manometer-port
